Projects

Alumni Association / *React.js, SpringBoot, BootstrapCSS, MySQL* August 2024
- The portal for the Alumni Association aims to manage job postings from both alumni and administrators, facilitate their responsibilities as mentors or recruiters, and enable administrators to verify job posted by alumni, and schedule events such as webinars, reunions, and interview dates.
- GitHub Repository (*Link*)

To-Do List App / *HTML, BootstrapCSS, JavaScript* April 2022
- Designed a Simple TO-DO List app where users can simply list down their daily Todo's and mark them as Checked or Un-Checked.
  Project Link (*Link*)

Intelligent WheelChair / *Spartan 3A FPGA, Xilinx,Verilog,VLSI* - 2021
- The project was targeted towards handicap individuals which help them to navigate using their   inputs. It also includes obstacle detection, and we were able to see huge interests by the end of the prototyping period.
